THE NEWSLETTER FOR CUSTOMERS OF ACC+ESS LIMITED- MANUFACTURERS OF THE PROTOCAB WIRELESS MODEL RAILWAY CONTROL SYSTEM

## LOCOMOTIVE SETS: SUMMER SPECIAL

We're very aware that it's been a frustrating few months for our Owners, with the Coronavirus lockdown providing the opportunity to catch up with modelling and not being able to extend your Protocab-fitted fleet.

We are delighted to announce that the Locomotive Sets will soon be available again and to say 'thank you' for your patience, we are offering, for the month of August, a special price for the Locomotive Sets of £90 including VAT, a 10% saving on the normal price of £99.50, with delivery expected in the second week in September.

With immediate effect, we have amended the prices for the Locomotive Sets on the [protocab.com](http://protocab.com) website and you can order the Loco Sets now.

We've also adjusted the postage limit, so that the Locomotive Sets

are postage free.

We are also offering another special for you - order *four* Locomotive Sets in August and the price for the four is a **further 5%** reduction, £340 including VAT, equal to £85 each (only available by telephone).

The following varieties of Locomotive Set are covered by this special offer:

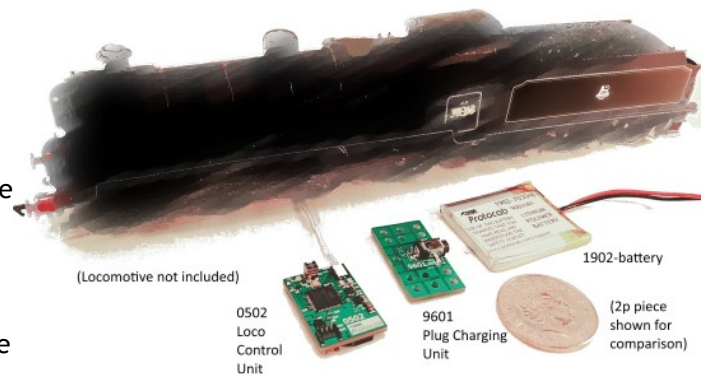

0052L: includes 0502 Locomotive Control Unit, 9601 Plug Charging Unit and 1902-653040 battery

0052S: as for the 0052L but with the 1902-902030 (small) battery

0052XL: as for the 0052L but with the 1902-902944 (extra large) battery.

Each of the above

are available in any combination to make up the extended special offer of *four* Locomotive Sets. If you'd like a set of four at the extra reduction discount price, or if you prefer not to order an individual Locomotive Set through the website, please contact us on 07831 231164.

(Locomotive not included)

0502  
Loco  
Control  
Unit

9601  
Plug Charging  
Unit

1902-battery

(2p piece  
shown for  
comparison)

***This special offer is available throughout August only!***

### **Some questions answered:**

*I intend to switch over to the New Products when available, and I have already elected to trade-in my existing LCUs or 9601 PCU. If I buy the Locomotive Sets this month, can I trade them in for the New Products?*

Yes, just let us know that you will want to do that and we will send you a revised statement to include the additional trade-in items.

*Do I have to go through the old passcode tapping routine to adopt these new 0502s to my 0201 Direct Controller?*

No, if you've updated your 0201 Direct Controller to the latest firmware version, these 0502s are shipped with the latest firmware

(0.0B) and you can follow the simple one button adoption process outlined in the 0201 Direct Controller User Guide version 6.0 or later. If you bought your 0201 Direct Controller earlier than 2017 and haven't yet updated it to the latest firmware version, we recommend that you carry out that update before attempting to adopt your new 0502 LCU(s). If you aren't sure whether your 0201 Direct Controller is at the latest version, please contact us on 07831 231164 and we can advise, alternatively email [support@protocab.com](mailto:support@protocab.com)

*Will I need to update my existing 0502 LCUs to operate with the*

*new ones?*

No, they are totally independent. The new 0502s are shipped to the latest version of firmware which has been available since 2017. As with the 0201s, if you purchased your existing 0502s prior to 2017, and haven't upgraded them since then, you might want to take this opportunity to bring them fully up to date.

*If I want to purchase more than four Locomotive Sets under this offer, will I be able to get a special price?*  
Yes, please telephone 07831 231164 to discuss.
